SUMMARY

Information Technology professional specializing in software development, automation, and broadcast systems. Experienced in Python, JavaScript, REST APIs, Playwright, and WebSockets, with hands-on experience building real-time monitoring systems, AI-powered dashboards, workflow automation tools, and custom control systems. Focused on using technology to solve real-world problems, improve workflows, and build reliable solutions for production environments.

EDUCATION

Bukidnon State University

Bachelor of Science in Information Technology (2020 – 2024)

STI Malaybalay

Technical-Vocational-Livelihood — Information Technology, Senior High School (2018 – 2020)

Bukidnon National High School

Special Program in Sports, Junior High School (2014 – 2018)

EXPERIENCE

IT Intern – Cash Unit (OJT)

Department of Education, Malaybalay City

- Assisted in computer troubleshooting, data encoding, and loan and voucher processing.

IT/Technician

2025 – Present

Bombo Radyo Malaybalay

Technologies: Python, JavaScript, React, REST APIs, Playwright, WebSockets, OSC, Git, Linux

- Built **news-headline-crawler**, an automated news headline crawler that gathers the latest news from various sources to build a centralized real-time intelligence board.
- Engineered the **Bombo Radyo News Intelligence Hub**, a full-stack platform aggregating 50+ live feeds and pushing breaking news alerts directly to Discord using webhooks.
- Developed **Nautel AUI Monitor**, a real-time transmitter health dashboard with custom telemetry alerts, enabling 24/7 unattended monitoring and reducing equipment downtime.
- Developed **Media Rename Automation**, a PowerShell utility for batch-renaming video files using strict regex pattern matching, saving hours of manual data entry.
- Programmed **X32 Remote Toggle** using OSC protocols for Behringer X32 mixers, achieving sub-50ms state synchronization and eliminating manual hardware switching.
- Developed and maintained an automated **OBS Studio** broadcast production system for managing cameras, graphics, audio, media playback, scene switching, and live broadcast layouts. Implemented automation scripts and keyboard shortcuts to streamline broadcast operations and reduce repetitive production tasks.
- Developed OBS automation tools (**Media Automator** & **OBS Scene Autosort**) that reduced repetitive production setup time by approximately 70% and improved workflow consistency during live broadcasts.
- Developed a **Drama Report Generator** using Raduga in VirtualBox, automating broadcast log and performance report generation and reducing manual data entry by approximately 90%, improving reporting efficiency and accuracy.

IT Support & Hardware Technician

Freelance

General IT Services

Technologies: Hardware Diagnostics, Network Configuration, Technical Documentation, Video Editing

- Performed diagnostic troubleshooting, component upgrades, and repair services.
- Installed operating systems, software packages, and system drivers.
- Configured network routing and peripheral devices, improving workspace productivity for small offices.

SKILLS

Frontend

React • JavaScript • HTML5 • CSS3 • Vite • Responsive Design

Backend & Automation

Python • Node.js • Playwright • OSC Protocol • WebSockets • API Design

Database & Cloud

Supabase • PostgreSQL • REST APIs • Firebase App Hosting • Git/GitHub

Broadcast Systems & Tools

OBS Studio • Nautel Telemetry • X32 Control • Linux Systems • Video Editing

SPECIALIZATIONS

- Stream & Broadcast Automation
- Real-time Monitoring Systems
- OSC / WebSocket Integration
- Telemetry & Alerting
- AI-powered Intelligence Tools
- Custom Scripting & REST APIs

ACHIEVEMENTS

College of Technologies Athlete of the Year 2024 – Bukidnon State University
